Objective: Seeking an entry-level software development role building applications that solve practical problems.

EDUCATION

University of Wisconsin-Parkside Expected May 2027
Bachelor of Science in Computer Science GPA: 3.9/4.0

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL

Web Development: React, Next.js, Spring Boot, FastAPI, REST APIs, WebSockets, HTML/CSS

Databases and Data: MySQL, PostgreSQL, MongoDB, Supabase, Apache POI, Power BI, Microsoft Fabric

Testing and Tools: Vitest, React Testing Library, Git/GitHub, IIS, DataGrip, Excel

AI-Assisted Development: ChatGPT, Codex, Claude, Microsoft Copilot

RELEVANT EXPERIENCE

IT Analyst Dec 2024 - Present
UW-Parkside - Campus Technology Services Kenosha, WI

- Troubleshoot hardware, software, network, and account issues on a Tech Bar team handling approximately 40 tickets daily; document solutions and explain fixes to students, faculty, and staff.

Information Technology Intern (Software Development) May 2026 - Aug 2026
Twin Disc, Inc. Racine, WI

- Built and deployed an HTML/CSS/JavaScript manufacturing dashboard on IIS for 150+ shop-floor employees, replacing Excel displays with CSV-based production views that refresh every three minutes.
- Developed React/TypeScript frontend features and integrated REST APIs for an IP threat-assessment application used by the IT team; contributed modifications to the FastAPI backend.
- Built a Next.js/TypeScript ethics and compliance frontend with submission forms, progress dashboards, and views for reviewing AI-suggested information.
- Collaborated with business stakeholders, including executive leadership, to gather report feedback during the QlikView-to-Power BI migration.
- Compared QlikView and Power BI reports, exported data to Excel, and used a company-approved AI assistant to identify discrepancies; documented findings for IT team investigation.

Software Developer - University Industry Project Jun 2024 - Dec 2024
HARIBO / UW-Parkside Kenosha, WI

- Developed a Java application using Apache POI to combine three Excel files into weekly supply-chain reports, reducing report preparation time by an estimated 75%.
- Gathered requirements from the reporting manager and validated generated reports against business needs.

TECHNICAL PROJECTS

GradTracker Spring 2026
Next.js, TypeScript, Supabase, Vitest, React Testing Library | GitHub

- Developed frontend features in a four-person team building a degree-planning app for students and advisors; implemented administration pages with search and sorting, sign-in flows, and protected frontend routes.
- Wrote Vitest and React Testing Library tests covering role selection, signup restrictions, redirects, sorting, and UI rendering.

Lab Checkpoint Sign-Off Application Fall 2025
React, Java, Spring Boot, MongoDB, WebSockets

- Implemented React/Spring Boot WebSocket communication in a four-person team prototype for lab sign-offs, synchronizing student and instructor views of checkpoints and help requests without manual refreshes.

Hospital Database - Academic Project Spring 2025
MySQL, SQL, Bash, DataGrip

- Designed a 13-table relational database to organize hospital staff, patients, and appointments; wrote SQL scripts to automate routine database tasks.
